INDEX TO VOLUME 67

Antonippillai, A.: Subsemigroups of certain bands of nilpotent groups 388
Araújo, J.: Idempotent generated endomorphisms of an independence algebra 464
Arendt, W., Metafune, G., Pallara, D., and Romanelli, S.: The Laplacian with Wentzell-Robin boundary conditions on spaces of continuous functions 247

Bernik, J., Drnovšek, R., Košir, T., Omladič, M., and Radjavi, H.: Irreducible semigroups of matrices with eigenvalue one 271

Carvalho, C., and Torres, F.: On numerical semigroups related to covering of curves 344
Cheong, K.H., and Jones, P.R.: The lattice of convex subsemilattices of a semilattice 111

d'Alessandro, F., and Pasku, E.: A combinatorial property for semigroups of matrices 22
Delgado, M., and Héam, P.-C.: A polynomial time algorithm to compute the Abelian kernel of a finite monoid 97
Dolinka, I.: Regular *-semigroup varieties with the amalgamation property 419
Drnovšek, R., - see Bernik, J.
Du, L., and Shum, K.P.: On left C-wrpp semigroups 373

García-García, J.I., - see Rosales, J.C.
García-Sánchez, P.A., - see Rosales, J.C.
Geroldinger, A., Halter-Koch, F., Hassler, W., and Kainrath, F.: Finitary monoids 1
Golchin, A.: On flatness of acts 262
Grainger, A.D.: Ultrafilters on the collection of finite subsets of an infinite set 443
Grillet, P.A.: Computing finite commutative semigroups: part II 159
Grillet, P.A.: Computing finite commutative semigroups: part III 185

Halter-Koch, F., - see Geroldinger, A.
Hassler, W., - see Geroldinger, A.
Héam, P.-C., - see Delgado, M.

Jiang, Z.: The structure of 0-bisimple strongly E^*-unitary inverse monoids 50
Jiang, Z., and Nagy, A.: Corrigendum to "RGC_n-commutative Δ-semigroups" 468
Jiménez Madrid, J.A., - see Rosales, J.C.
Jones, P.R., - see Cheong, K.H.

Kaďourek, J.: On bases of identities of finite inverse semigroups with solvable subgroups 317
Kainrath, F., - see Geroldinger, A.
Kaiser, C., and Weis, L.: A perturbation theorem for operator semigroups in Hilbert spaces 63
Kilp, M.: When principally weakly flat acts satisfy condition (PWP) 454
Košir, T., - see Bernik, J.

Kühnemund, F.: A Hille-Yosida theorem for bi-continuous semigroups 205

Lin, C.-Y.: On generation of nonlinear operator semigroups and nonlinear evolution operators 226

Livshits, L., MacDonald, G., Mathes, B., Okniński, J., and Radjavi, H.: Matrix semigroups with commutable rank 288

Luo, M.: Relationship between the quasi-ideal adequate transversals of an abundant semigroup 411

MacDonald, G., - see Livshits, L.

Mathes, B., - see Livshits, L.

McFadden, R.B., and Seif, S.: Terseness: minimal idempotent generating sets for $K(n,r)$ 31

Metafune, G., - see Arendt, W.

Monzo, R.A.R.: Pre-compatible almost endomorphisms and semigroups whose cube is a band 355

Nagy, A., - see Jiang, Z.

Okniński, J., - see Livshits, L.

Omladič, M., - see Bernik, J.

Pallara, D., - see Arendt, W.

Pasku, E., - see d'Alessandro, F.

Picavet, G.: Localization with respect to endomorphisms 76

Portal, P.: Discrete time analytic semigroups and the geometry of Banach spaces 125

Radjavi, H., - see Bernik, J.

Radjavi, H., - see Livshits, L.

Romanelli, S., - see Arendt, W.

Rosales, J.C., García-Sánchez, P.A., García-García, J.I., and Jiménez Madrid, J.A.: The oversemigroups of a numerical semigroup 145

Schein, B.M., and Wu, H.Y.: Tight inverse semigroups that are not bisimple 432

Seif, S., - see McFadden, R.B.

Shum, K.P., - see Du, L.

Song, G., and Zhu, F.: Fundamental regular semigroups with inverse transversals 37

Takahashi, Y.: A counterexample to Sorenson's conjecture: the finitely generated case 429

Torres, F., - see Carvalho, C.

Weis, L., - see Kaiser, C.

Wu, H.Y., - see Schein, B.M.

Zhu, F., - see Song, G.
